

**BOSE**

**PROFLIGHT SERIES 2**  
AVIATION HEADSET

## Engineered by Bose. Refined by pilots.

The FAA TSO and EASA E/TSO-C139a certified ProFlight Series 2 may be our lightest aviation headset ever, but it also meets our toughest standards. That's because the ProFlight Series 2 has been engineered to withstand the harshest conditions in our quality assurance lab - from extreme temperatures and UV to moisture and impact - all so pilots can experience acclaimed Bose noise cancellation, comfort and clarity for years to come.

## FEATURES AND BENEFITS

**FAA TSO and EASA E/TSO-C139a certified.**

**4.5 ounce (128 gram) on-head weight.**  
For enhanced comfort during extended use.

**Thin, flexible cable.**  
Allows freedom of movement and easy storage.

**Digital active noise cancellation.**  
Reduces ambient noise, allowing users to lower radio volume.

**User selectable noise cancellation.**  
Customize noise cancellation according to personal preference.

**Long term durability.**  
Designed and tested for demanding cockpit environments.

**Active equalization.**  
Enhances clarity and intelligibility.

**Tap control for talk-through communication.**  
Double tap either earbud to optimize audio for communication outside of the intercom.

**Bluetooth® connectivity and audio prioritization.**  
Control how *Bluetooth* audio interacts with the intercom system.

**Quick-release, side swappable mic and cable.**  
Attach on either side – no tools required.

**Easily adjustable mic.**  
Mic winglets allow for precise mic and boom adjustments.

**Exceptional battery life.**  
Two AA batteries power 45+ hours of use with *Bluetooth* off and at least 25 hours with *Bluetooth* on.

**Five-year limited warranty with acclaimed service.**  
Worldwide coverage. Excludes wear items like StayHear+ tips, mic cover and headband.

## CONFIGURATION INFORMATION

Different cable configurations may be purchased separately and added easily.

### AVAILABLE CONFIGURATIONS:

Dual General Aviation (G/A) plug	5 pin XLR plug
Aircraft-powered 6 pin LEMO connector	6 pin adapters to U-174 and dual G/A plug available

All configurations are available with *Bluetooth*. Non-*Bluetooth* variants are available for dual-plug and 5 pin configurations.

### BLUETOOTH MODELS FEATURE:

- Full-function *Bluetooth* connection to phones, tablets or EFBs
- HFP, A2DP, AVRCP and multipoint profiles
- Options to mute or mix *Bluetooth* audio with intercom audio

All configurations feature an electret mic optimized to reject far-field noise and improve performance with “hot mic” systems.
